

Windowmaker Option CAD Link II

Overview

A facility to transfer fully scaled elevation and cross-section details of Sales Lines to IntelliCAD® or AutoCAD®.

Benefits

The Fabricator/Profile Company

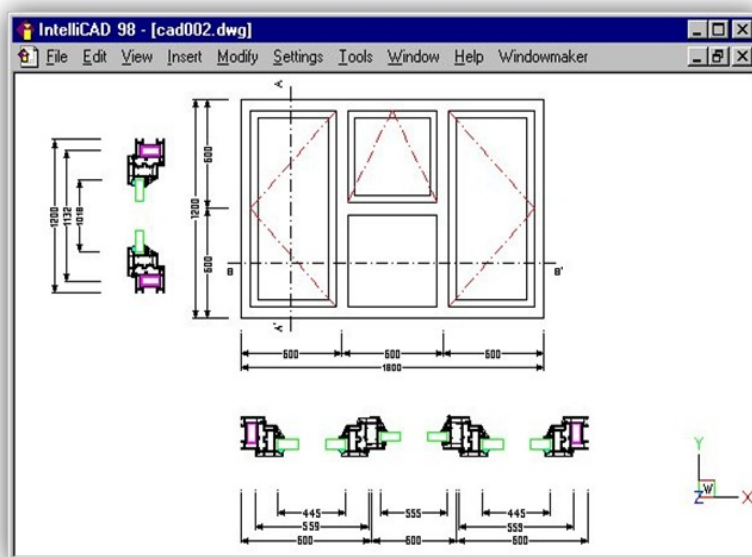

- ▲ Gains the ability to easily transfer details to a CAD application by seamless integration with Windowmaker

The Architect/Specifier

- ▲ Eliminates mistakes by directly using accurate details exported from the program

Features

- ▲ All the features of [CAD Link I](#)
 - ▲ You can define the scale and dimension line offsets for elevation and cross-sections, while exporting the DXF file
 - ▲ You can generate all possible horizontal and vertical cut-through section details for 2D Sales Line elevations
 - ▲ The program allows for full or partial cuts
- Note:** Cross section cut-throughs are not supported for 3D blocks.
