

Windowmaker Option Conservatories

Overview

A facility to create or modify Conservatory Sales Lines.

Benefits

Fabricator/Salesperson:

- ▲ Gains the ability to easily create Conservatory Sales Lines using pre-defined styles
- ▲ Gains the flexibility to handle complex Conservatory geometry and perform additional detailing through an associated CAD program
- ▲ Impresses customers by producing accurate and attractive graphical reports

Features

- ▲ You can input a Sales Line based on a selection of standard Conservatory styles:
 - △ Edwardian
 - △ Victorian 3-facet
 - △ Victorian 5-facet
 - △ Lean-To
- ▲ You can specify various Conservatory roof details including:
 - △ Maximum Rafter Spacing
 - △ Profile Thickness
 - △ Wall Thickness
- ▲ You can modify centre facet dimension for Victorian 3, 5 Facet Conservatory sales line
- ▲ You can set-up different Roof Systems for the conservatory Sales Lines
- ▲ You can directly enter the roof height, or specify a roof pitch to automatically calculate the height
- ▲ You can import RoofWright 6 conservatory Sales Lines into Windowmaker as door/window Sales Lines. For details refer [Link to RoofWright](#)
- ▲ The program can handle costing of Conservatory roof as a single component
- ▲ You can add or edit options, features and glazing details during order entry
- ▲ You can instantly view details for costing, pricing and bill of materials
- ▲ You can transfer the Conservatory details as a DXF and open this in a CAD application, viz. IntelliCAD® or AutoCAD®
- ▲ You can manually add or edit roof components in wire-frame mode using normal CAD facilities
- ▲ You can specify various Roof Options - External/Internal Finish, Eaves, Cresting and Finial
- ▲ Windowmaker provides a customisable program extension to design 3D Conservatory roofs. These can be used to handle various types of adjustments and calculations, e.g.:
 - △ Calculate the actual lengths and end-cuts for the roof profiles
 - △ Draw the 3D glass for the conservatory roof

Windowmaker Option Conservatories

- ▲ Generate any specialised profiles or unit parts like adapters, end caps, screws, etc.
 - ▲ You can generate several reports for the Conservatory:
 - ▲ Cill Cutting Plan
 - ▲ Brickwork Plan
 - ▲ All Views
 - ▲ 3D Model
 - ▲ You can specify the border and text height parameters for the reports
- Note:** You need the [Roof B.O.M.](#) facility to store roof details in the Windowmaker database.

Related Options

- ▲ Windowmaker has started handling Conservatory Sales Lines. Full functionality for Conservatories will be available in a future release. Please [contact](#) Windowmaker for more information.
- ▲ You need Windowmaker [Express](#) or higher / [Windowseller](#)
- ▲ You need appropriate CAD software viz. IntelliCAD® or AutoCAD®
- ▲ You require [Angled Heads I](#) to create Lean-To Conservatories
- ▲ You need to install the [CAD Link I](#) option, included as standard with Conservatories
