

Windowmaker Option

XML Electronic Glass Order

Overview

A facility to export details of glazing in XML (eXtensible Markup Language) format.

Benefits

The Fabricator:

- ▲ Gains the ability to transfer glazing requirements to a glass supplier electronically
- ▲ Avoids mistakes, like ordering incorrect glass sizes
- ▲ Eliminates the need to fax glass orders
- ▲ Achieves improved delivery times from the glass supplier
- ▲ Gains the ability to use the order file to interface with other systems

Features

- ▲ You can output comprehensive details of glazing including shapes and Georgian
- ▲ The program supports various types of products:
 - △ Single, double or triple glazing
 - △ Rectangular grids
 - △ Leading
 - △ Stepped Units
 - △ Mix thickness Georgians and T Georgians
- ▲ The program can generate separate output file for each Glass Supplier used in a batch
- ▲ The program can generate Glass XML file with the Shape code and parameters depending on the Shape Authority selected for each Supplier

Related Options

- ▲ **Software:** e.g. Internet Explorer 5.0 or higher can be used to view the output file
- ▲ The Document Type Definition, glazing.dtd, can be downloaded from <http://www.windowmaker.com/en/gsdnload.aspx>

▲ To download:

1. Right click on the above link. (Left click if your mouse button is configured as Left-handed)
2. Specify 'Save Target As.' if using Internet Explorer, or 'Save Link As.' if using Netscape
3. Specify File name as "glazing.dtd" and Save it on to your local disk
