

Windowmaker Option

Express Sales Clients

Accessing the information, you need can be difficult - in the office, or out.

The new Sales Client from Windowmaker makes it simple. For any sales staff from order entry to mobile workers, the Windowmaker Sales Client gives you the features you need and access when you want it, enabling sales staff to:

- ▲ Access Windowmaker out on the road
- ▲ Easily send and receive updates from the main Windowmaker system

The Sales Clients are ideal for both internal and external sales staff – external staff can become truly mobile, while retaining access to key Windowmaker data. Meanwhile, internal sales staff benefit from a low cost, role-based client specific to their job that gives them access to all the key Windowmaker functions they need.

For [Windowmaker SQL, the Sales Client](#) allows remote staff to easily switch between working in the office, working out on the road but connected to the main Windowmaker system over a secure internet connection, or even working offline with simple replication of data when back in the office or online.

For [Windowmaker Express, the Sales Client](#) allows remote staff to work offline on their own database, and easily send and receive updated customer, sales order and product information – such as sales quotes and orders.

For more information on the Windowmaker Sales Clients, and how they can free your sales staff, [contact us](#) today.
