

Georgian Grids & Sunbursts

Overview

The Georgian Option allows for the creation of a comprehensive range of Georgian (Colonial) or Federation Grids. The Sunburst facility allows creating arched shaped sales lines with Sunburst Georgians.

What are the benefits?

The sales person

- ▲ Impresses customers by instantly presenting sales lines with various kinds of Georgians (Sunburst, Real and Stuck-on)
- ▲ Gains the ability to rapidly manipulate grids and create realistic designs.

Fabricator

- ▲ Gains the ability to calculate and manufacture shaped sales lines with Georgians according to the customer's specifications.

How it works

The option includes a Grid Wizard, making the production and manipulation of realistic Georgian and Sunburst designs easy. As with all window and door designs, the detailed graphics are fully scalable for output to sales quotes.

These Georgian designs can then be output to various production related documents eliminating manufacturing errors.

Key Features

The option includes the ability for the user to:

- ▲ Include Georgians in Bays & Bows, Angled, Arched, Coupled or normal designs.
- ▲ Mix Georgians with non-Georgians in a design.
- ▲ Apply Real Georgians (with separated glass), stuck-on Georgian bars or Georgian bars incorporated into a sealed unit.
- ▲ Add, move or delete Georgian bars or sub-bars (T-Georgians), in [Express](#) and higher.
- ▲ Apply Georgians bars having diamond or square crucifix types.
- ▲ Apply Georgian bars of different thicknesses.
- ▲ Automatically position bars for equal sightlines, manually position or even omit when close to the glass sightlines.
- ▲ Align bars easily. The user has the option of aligning by centres, tops or bottoms, with transoms aligned by bars or bars by transoms. Aligning can also be referenced to construction lines or bars in equalised panes.
- ▲ Set-up coloured Georgian bars that can be displayed during order entry and printed on Customer Documents and various Windowmaker Reports.
- ▲ The flexibility of the pricing element gives the option of pricing as extras based on bar lengths or field count in a plane.

Georgian Grids & Sunbursts

- ▲ Precisely scaled Glass templates show glass sightline and Georgian spacing for individual glass pieces. Glass information can then be included in Glass Usage or the Glass XML file.

The Sunburst feature facilitates the user to:

- ▲ Include Sunburst Georgians in Semi-circular, Radial, Extended Semi-circular and Extended Radial shapes.
- ▲ Include Georgian spokes such as Gothic, Extended Gothic and Extended Basket.
- ▲ Delete complete/partial spoke bars.

Minimum Requirements

Hardware: Standard Windowmaker Specification. For more details click [here](#).

Windowmaker [Express](#), [SQL](#) or [ERP](#), [Windowseller](#)

Software:

- ▲ For Georgians - Windowmaker Lite or higher
- ▲ For Sunburst – Windowmaker Express or higher
