

Windowmaker Option

Glass Export (A&W)

Overview

The Glass Export for A&W option enables Windowmaker to generate Purchase Orders for glass in the format required by Albat+Wirsam, enables simple and efficient electronic ordering.

All glazing requirements, including the detailed order specification, can be created as an electronic order that can be sent to Albat+Wirsam and imported directly into their system. This can be individual jobs, or a range of orders.

This means that manual order entry mistakes are eliminated, time is saved through re-processing and delivery times are improved through the instant transfer for orders. Orders can be emailed, or transferred directly using FTP, and are archived for easy reference in the future.

▲ Order details can include:

- ▲ Single, double and triple glazing
- ▲ All the glass shapes supported by Windowmaker with appropriate shape code and parameters according to the 'Albat+Wirsam' (A+W) shape catalogue
- ▲ Grids with appropriate details including Georgian sub-bars
