

# Windowmaker Option Leaded

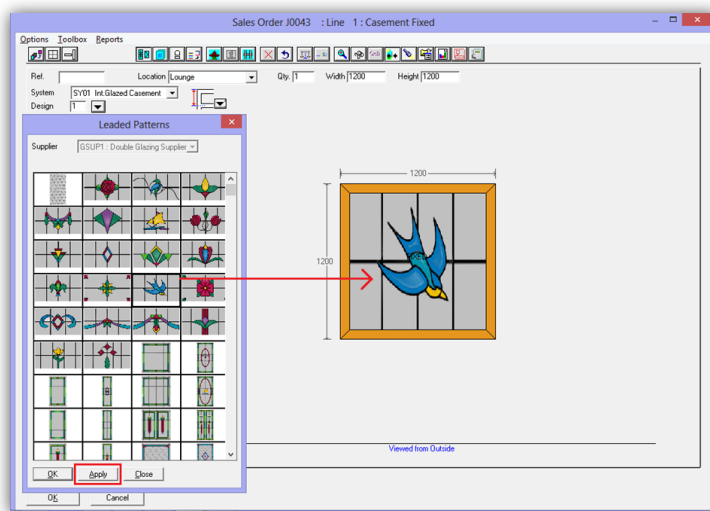

## Overview

The Leaded option allows the user to easily create leaded designs and include them in Sales Lines/Orders and Crystal Reports - Leaded Displacements (for type MTO glass) and Purchase Order (for type BTO glass).

## How it works

You can choose from a comprehensive range of graphics from the Windowmaker Library, to include the leaded designs in the Sales Lines/Orders and Crystal Reports.

The Leaded Displacements Report is used to output/generate Sales Lines/Orders that display the distance between glass panes.

Applying Leaded Pattern during Order Entry

Purchase Order with Leaded Pattern

## Key Features and Benefits

- ▲ Additional leaded graphics and designs can be imported, and associated with glass records if required
- ▲ The leaded pattern graphic can be included on various Windowmaker Reports - Leaded Displacements and Purchase Order.
- ▲ The Leaded Displacements report includes displacements between the outer edge of the frame and the edge of the glass, or between frames.
- ▲ Glass descriptions and individual pane sizes can also be included.
