

Windowmaker Option

Link to Glass Cutting Tables

Overview

A facility to automatically control glass-cutting operations by integrating Windowmaker to your cutting table.

Benefits

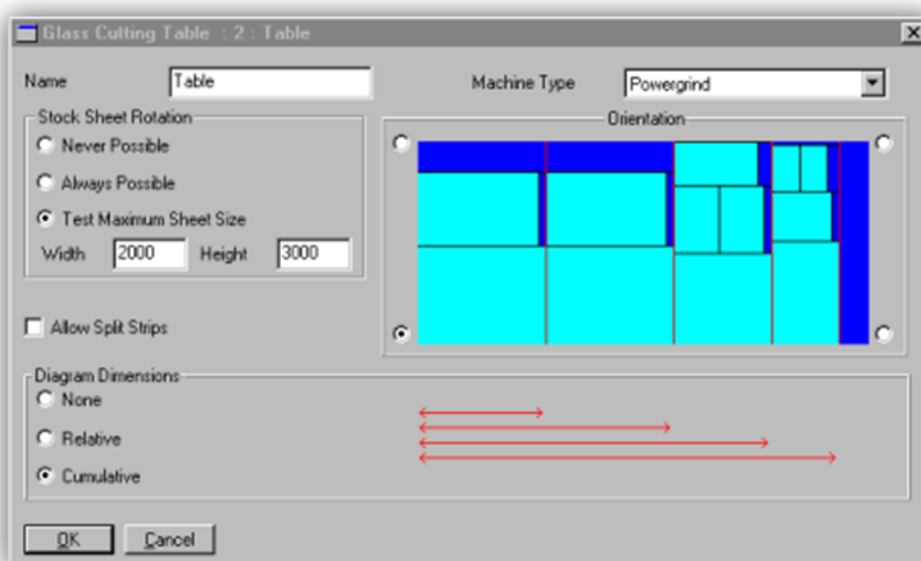

The Fabricator

- ▲ Saves time by easily setting up cutting parameters and methods
- ▲ Increases output by maximising cutting speeds
- ▲ Reduces costs by cutting down wastage
- ▲ Guarantees standards by achieving better control of cutting operations
- ▲ Maximises shop-floor productivity and efficiency by using fast and accurate link

Features

▲ You can:

- ▲ Define up to 10 different glass cutting tables
- ▲ Specify the maximum sheet size
- ▲ Determine the orientation of the cutting table
- ▲ Specify parameters such as the maximum number of Y-cuts
- ▲ The program outputs the cutting instructions in a sequence optimised for fastest cutting
