

Windowmaker Option

Link to Hinge Machines

Overview

A facility to automatically control hinge operations by linking Windowmaker to a Hinge machine.

Benefits

The Fabricator

- ▲ Maximises returns on investments in machinery by achieving accurate control of operations
- ▲ Reduces costs by eliminating errors and wastages

Features

- ▲ The program can handle hinge operations for Sashes and Frames
- ▲ You can set-up operations for a Hinge machine in Windowmaker
- ▲ The program can automatically generate Hinge operation instructions for each profile piece
