

Windowmaker Option

Link to Stock

Overview

A facility to integrate Windowmaker with Stock (Inventory) systems.

Benefits

The Fabricator

- ▲ Saves time and eliminates mistakes by automatically recording stock issues

Features

Simple Link (available now)

- ▲ The program exports the stock transactions in an ASCII file
- ▲ Stock transactions can then be imported to the Stock system via a separate program (external to Windowmaker)
- ▲ Depending on the circumstances, this program may be provided by:
 - △ Windowmaker Software Ltd
 - △ The User
 - △ A third party

Sophisticated Link (planned for future releases)

- ▲ The Stock module in the program can:
 - △ Get stock details - including levels
 - △ Post issue transactions
- ▲ Depending on the circumstances, this module may be replaced by a special one for accessing a particular stock system. The module may be provided by:
 - △ Windowmaker Software Ltd
 - △ The User
 - △ A third party
- ▲ Windowmaker Software Ltd will offer a Stock module for the popular Pegasus Opera accounting system
- ▲ The module could even access the customer data on a different operating system

Related Options

- ▲ You need [Windowmaker Express](#) or higher
- ▲ **Software:** You need the stock system
