

# Windowmaker Option

## Part Usage

### Overview

A facility to output a list of parts used in Sales Lines.

### Benefits

#### The Fabricator

- ▲ Gains ability to instantly generate information on parts used
- ▲ Avoids mistakes by utilizing clear, distinct manufacturing instructions

### Features

- ▲ The program can display the:
  - △ Sales Order and Sales Line numbers
  - △ Part with Stock number
  - △ Slot
  - △ Quantity
  - △ Size
  - △ Saw code
  - △ Saw cutting angles, if other than 45° or 90°
- ▲ You can output the part usage for all or selected costheads

**Note:** In Windowseller, Parts belonging to the Costhead 'Installation' will only be output.

- ▲ You can set-up each costhead to determine how the usage report is to be collated:
  - △ A separate report for each job
  - △ A single report for the whole batch
  - △ A report in the Sales Line sequence instead of size sequence
- ▲ The program allows you to:
  - △ Print in condensed mode
  - △ Choose metric or imperial sizes
  - △ Output sorted details and totals or only totals
  - △ Include or exclude transom joins and location in the report
