

Windowmaker Option

Partial Delivery

Overview

A facility to selectively manufacture, deliver and invoice specified Sales Lines within a Sales Order.

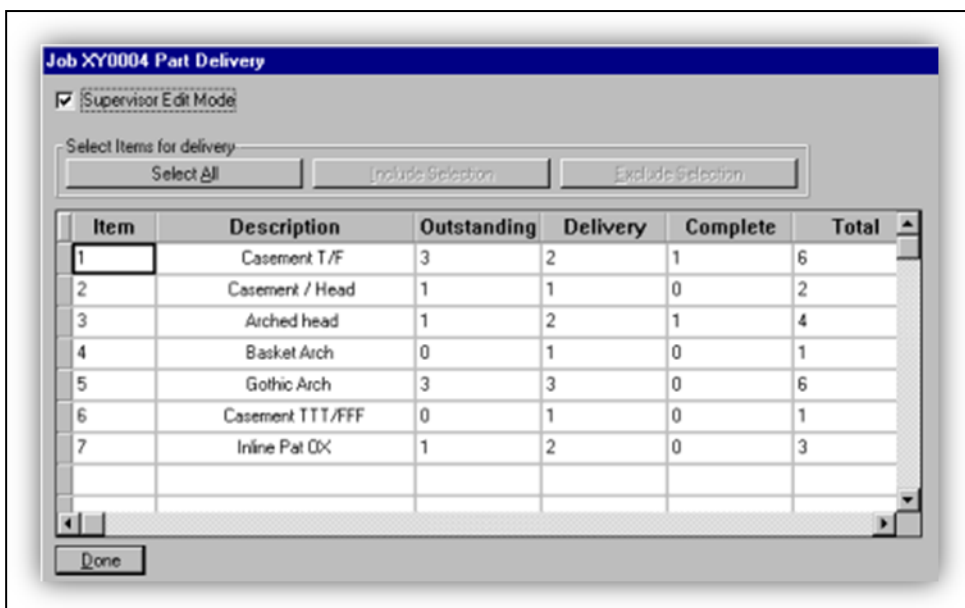

Benefits

The Fabricator

- ▲ Eliminates need to create separate Sales Orders for Sales Lines having different delivery dates
- ▲ Enables invoicing of delivered quantities of an order
- ▲ Decreases idle time by scheduling sales lines based on availability of components
- ▲ Allows selective processing of individual sales lines for re-makes
- ▲ Adds flexibility to the manufacturing process, for example by allowing last minute alterations

Features

- ▲ You can:
 - △ Select sales lines of a particular window style or all Sales Lines in a Sales Order
 - △ Specify a part of the total quantity, to be delivered for selected Sales Lines in 'Supervisor Edit Mode'
 - △ Edit outstanding and complete quantities
- ▲ The program can:
 - △ Automatically set a Sales Line to complete when delivery is done
 - △ Produce Invoices, Order Acknowledgments, Quotations and Despatch Notes, for selective Sales Lines produced or delivered
 - △ Display outstanding amounts on Invoices, Order Acknowledgments, Quotations and Despatch Notes, if used with the [Customer Documents](#) | or [Customer Documents](#) || option

Notes: Only a user with Supervisor rights can fully utilise this facility.
