

Windowmaker Option Production Scheduling

Overview

The maintenance and use of a consistent Production Schedule.

Benefits

The Fabricator

- ▲ Is able to control the production schedule to ensure that resources are well used, but not overloaded
- ▲ Is able to ensure dates are consistent with:
 - △ The expected receipt of [Purchases](#)
 - △ The planned [Deliveries](#)
 - △ Has a sound basis for making commitments to customers

Features

- ▲ You can plan your production batches weeks or even months in advance
- ▲ Windowmaker will propose a default Production Batch for a Sales Order
- ▲ You can move the whole Sales Order to another batch
- ▲ Windowmaker continually checks that the schedule remains valid
- ▲ The program can display the slack days available - before and after the date of production
- ▲ You can generate weekly production loading report for each bottleneck using integrated Crystal Reports

Note: See also [Advanced Production Scheduling](#) option.

▲ The user-friendly tabular interface of Production batches facilities:

- △ Sorting and filtering of records on multiple columns
- △ Searching and grouping of records
- △ Selection and deletion of multiple records
- △ Customisation of columns viz. hiding, showing, resizing and repositioning
- △ Customisation of dialog layout e.g., specifying horizontal/vertical lines and different colours for odd/even rows
- △ Toolbars and menu facility to invoke facilities
- △ Short-cut menu to Add, Open, Copy and Delete records

- ▲ You can move sales order/sales lines from one production batch to the other in a very convenient manner
- ▲ The program can allow multiple users to simultaneously access the same. This saves time of users who only want to view a Production Batch that is being modified by another user

Windowmaker Option Production Scheduling

▲ Windowmaker comes with the advanced feature of Production Rescheduling. Using this you can:

▲ Automatically reschedule Sales Orders between two production dates

▲ Split a Sales Line into sub-sales lines and then schedule each sub-sales line individually

▲ A log of all the scheduling activities is maintained in the History page of each Sales Order
