

Windowmaker Option

Quick & Easy 'One-Off' Designs

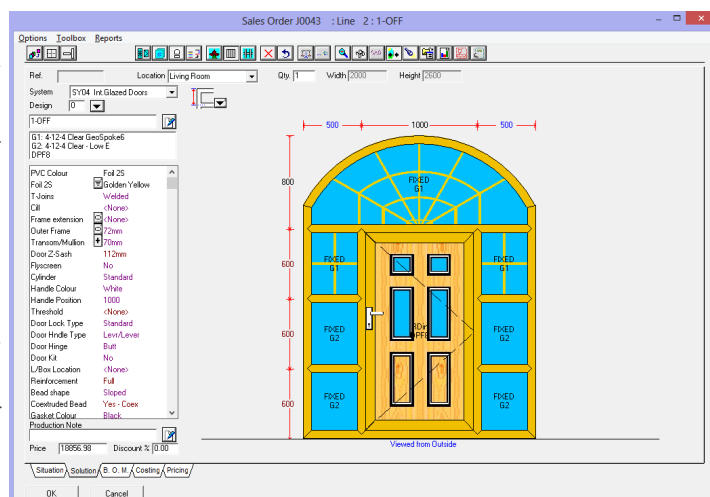

Overview

In addition to a comprehensive library of templates, Windowmaker allows you to quickly and easily create new designs based on your own specification. These can be adaptations of standard designs, or new ones that can be saved as future templates.

Key Features & Benefits

- ▲ Enter your own design description to override the current description
- ▲ Drag and drop transoms and mullions of different thicknesses into any frame or sash
- ▲ Drag and drop couplers (vertical or horizontal) to split a single frame into multiple frames.
- ▲ Display different dimension types
- ▲ Display all profile details (e.g., mitred or butt end-cuts, cill horns)
- ▲ Change the continuity of the corner/crucifix joins for individual profiles during order entry

Windowmaker offers the capability to:

- ▲ Determine the preferred answers for the options
- ▲ Easily toggle between inside or outside views of a design
- ▲ Automatically display errors and warning messages
- ▲ Display the details on the BoM page
- ▲ Calculate costing and pricing for the individual design Sales Lines
