

Windowmaker Option

Roof BOM

Overview

Facility to calculate and store B.O.M. details for a [Conservatory](#) roof in the Windowmaker database.

Benefits

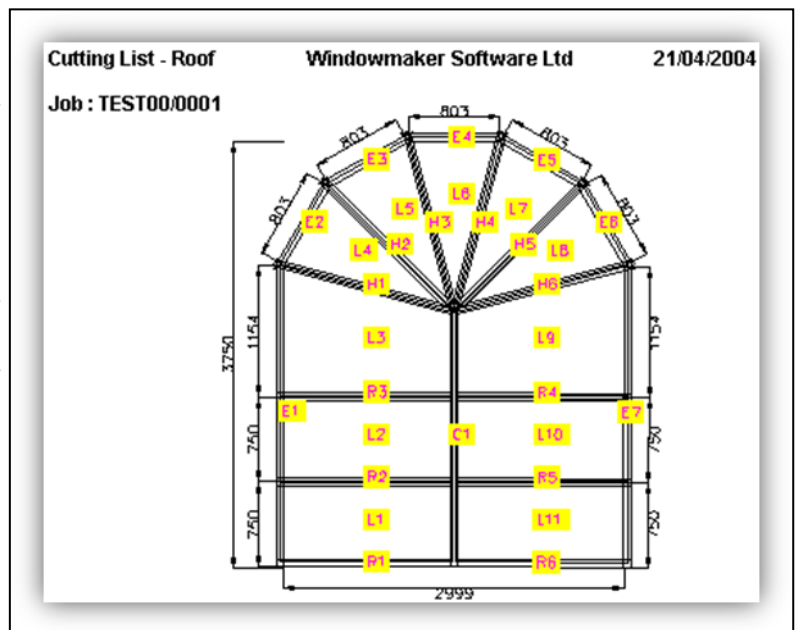

The Fabricator

- ▲ Gains the ability to generate and store B.O.M. details for each Conservatory roof component in the database
- ▲ Gains the ability to accurately cost and price conservatories based on a complete B.O.M. that includes roof details
- ▲ Gains the flexibility to generate roof cutting details using integrated Crystal Reports
- ▲ You can create a conservatory Sales Line in Windowmaker and directly export the details as a 3D DXF

Features

- ▲ The program will:
 - △ Open the Sales Line in an associated CAD application, viz. IntelliCAD® or AutoCAD®
 - △ Calculate and generate the B.O.M. information for each roof profile
- ▲ You can switch back to Windowmaker after saving and exiting from the CAD application
- ▲ The program will automatically:
 - △ Read the B.O.M. information for each roof profile
 - △ Determine the corresponding stock records for each roof B.O.M. and calculate the complete Sales Line costing and pricing
 - △ Provide a unique ID to each roof profile and glazing. The details will be reflected on the B.O.M. page
- ▲ The program will update the database with the roof B.O.M. details on saving the Sales Line
- ▲ You can generate a conservatory Roof Cutting List using integrated Crystal Reports
