

# Windowmaker Option

## Standard Products

### Overview

A facility to select standard design Sales Lines using a product code.

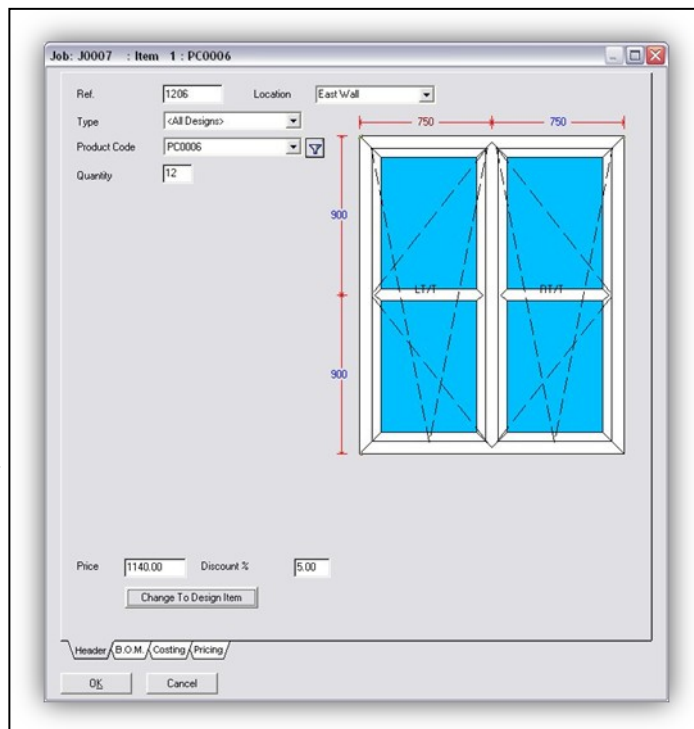

### Benefits

#### The Fabricator

- ▲ Eliminates the need to manually enter details such as system, width, height, design number, options, etc.
- ▲ Speeds up processes by reducing the Order Entry time
- ▲ Avoids errors by using Standard Sales Lines with product code

### Features

- ▲ You can set-up Standard Products having individual product codes
- ▲ The program can store various designs including non-rectangular, bays and 1-off Sales Lines
- ▲ You can add a Product Sales Line and automatically create a Standard Sales Line by specifying the product code

Name of Product	Type of Storage
Windowmaker Express	SQL Server Express or SQL Server database
Windowmaker SQL	SQL Server Express or SQL Server database

- ▲ Standard products can be filtered and displayed in a wall chart. The criteria for filtering may be any one, a combination or all of the following:
  - △ System
  - △ Vertical Panes
  - △ Horizontal Panes
  - △ Width
  - △ Height
- ▲ You can specify the following for a Sales Line:
  - △ Customer reference                      △ Location
  - △ Quantity                                      △ Discount
- ▲ You can instantly change a Standard Sales Line to a Design Sales Line, using a single mouse click
- ▲ The program can display the product code on various batch processing output including assembly list, order detail and customer documents
- ▲ The program can calculate and display Bill of Materials, Costing and Pricing for each Sales Line
