

Windowmaker Option

Store B.O.M.

Overview

A facility to store components used in a Sales Line as a B.O.M. record in the Windowmaker database.

Benefits

The Fabricator

- ▲ Gains the ability to store various type of B.O.M details in the database.
- ▲ Gains the flexibility to create, e.g., Periodic Component Usage reports for Sales Orders, or Costing Analysis reports using Crystal Reports.

Features

- ▲ The program offers a choice for storing various types of B.O.M. details in the Windowmaker database.
- ▲ You can specify 'All Components', to store details for each component used in:
 - Design Sales Lines, or
 - Non-design Sales Lines, viz. Stocked Standard Sales Line, Glass Sales Line and Product Sales Line.
- ▲ You can specify to selectively store design Sales Line details for:
 - Statistics
 - Costing/Costhead
 - Costing/Costhead with Statistic
- ▲ You can specify the Sales Order status for storing/updating and deleting the details.
- ▲ You can generate customised reports using the stored details in the database.
- ▲ Sales Order Status can be specified as the condition for the storage of the B.O.M. details of Pricing Extras parts in the Windowmaker database.

Related Options

- ▲ You need [Windowmaker SQL](#).
