

Windowmaker Option

Stored Price List

Overview

Instead of using a basic marked-up pricing model, Windowmaker allows the use of advanced Price Lists based on matrices. These can be setup as part of the product data, allowing complex pricing systems to be used to accurately and instantly price sales lines and sales orders, per customer.

Key Features

- ▲ Provide automatically generated printed price lists for easy reference
- ▲ Easily set up matrices using definable limits and conditions
- ▲ You can input and store up to 999 price matrices
- ▲ The values in the price matrix can be input directly or imported from a Microsoft Excel file, or globally modified by a defined percentage
- ▲ The generation of price lists based on the stored price matrices
