

Windowmaker Option Timber

Overview

A facility to create Arch shaped wooden Sales Lines.

Benefits

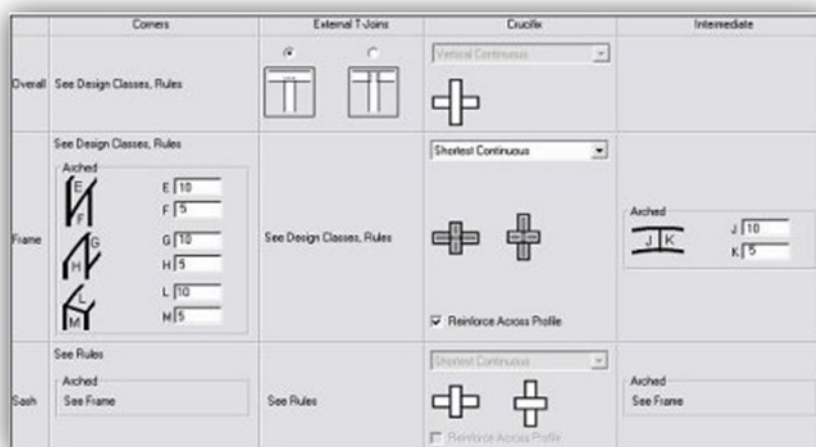

The Sales Person

- ▲ Increases sales prospects by easily creating and presenting realistic Arch shaped wooden Sales Lines
- ▲ Gains the ability to quickly modify a design to suit customer requirements
- ▲ Impresses customers by instantly quoting Arched design price

The Fabricator

- ▲ Gains the ability to calculate and manufacture Arched wooden Sales Lines
- ▲ Gains cost effectiveness since the program automatically calculates the number of segments in which the top curved profile should be split. This depends upon the width set for the main profile from which the segments will be made

Features

- ▲ All the features of [Arched Heads](#)
- ▲ The Arched top is fabricated using several curved segments made out of rectangular pieces of wood
- ▲ The program can automatically calculate the number of segments in which the arched top should be split
- ▲ You can specify the Parent Part, i.e., the piece of wood from which the curved segment of the Arched Sales Line will be made
- ▲ You can enter the adjustment values for the joins of the Arched Sales Lines
- ▲ The program can automatically generate B.O.M Lines for each segment

Related Options

- ▲ You need [Windowmaker Express](#) or higher
