Windowmaker Option
Toughened Glass Report

WINDOWMAKER® SOFTWARE

Overview

A facility to output details of individual glazed pieces that are toughened.

Benefits

The Glass Shop/Supplier

- Gains flexibility to easily identify all toughened glass pieces
- Avoids mistakes by using clear, distinct glass details

Features

- You can extract information on all toughened glass used singly or within a sealed unit
- The program can output various toughened glass details for each Sales Line:
  - Line number
  - Sales Order and Sales Line numbers
  - Pane type
  - Quantity
  - Size (**w**idth x **h**eight)
  - Leaf description
  - Glass area
  - Cost
  - Total cost

Toughened Glass — Your Company — 1 Jan 01

TOTAL								61.92

Note: The output sequence is based on the Sales Lines within a Sales Order in the batch

- The Glass cost is based on the 'Cost/Area' (setup in Glazing) and not from the glass pattern
- The Glass cost is calculated on the 'Minimum Area' for costing (setup in Glazing), if the area of the piece is less than this minimum area

Related Options

- You need Windowmaker Express or higher
- Data: Toughened glass needs to be set-up as a specific (single-glazed) glass type and not as a pattern
