Windowmaker Option

Using Panels

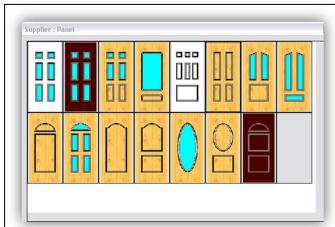

Overview

The Windowmaker Panels option allows a range of standard decorative panels to be included in a design, including full graphical display and cost/pricing calculations.

All available panels can be incorporated into the Order Entry Process; with order verification included so incompatible panels are excluded.

Integrated graphics means that Sales Quotes and Order confirmation contain full colour images of the selected panel as part of the complete Sales Line.

Key Features & Benefits

- ▲ Panels can be specified and directly applied to a pane during Order Entry
- ▲ Panels are displayed with full graphics, including for quotations and in the Photo Fronts feature
- ▲ Panel Types includes Door and Side Panels (both full and half below mid-rail)
- ▲ Order Verification ensures only valid type and sized Panels can be included
- ▲ Panels can be applied to more than one pane of a similar type – e.g. all doors
- ▲ Beading is automatically calculated based on the Panel size and thickness
- ▲ Costing and pricing is dynamically calculated
