

## Multiple profile and Fittings Modules

### Overview

A facility to set up upto 3 Profile and Fittings modules each.

Useful to fabricators who deal with:

- Multiple materials (e.g. PVC-U, Aluminium, and Wood)
- Multiple suppliers within a single material (e.g. Premium and cheaper PVC-U systems)
- Old and New 'versions' of profile and fittings data

### What are the benefits?

- Improves operational efficiency by having a single integrated dataset.
- Saves time and money by minimising maintenance.
- Benefits from a shorter turnaround time and increased throughput.
  - Effective Order Entry - Same quotation can contain multiple material/supplier data.
  - Consolidated Reporting & Sales Analysis can be generated for multiple material/supplier data.

### Key Features

Each of these modules accommodates up to 3000 parts and 99 subsystems.

### Minimum Requirements

Available with [Windowmaker Express](#) or higher.
